

Retail Intelligence - Executive Summary

Day 4 Python EDA and Business Insights

August 2026

Analysis based on Day 2 KPI exports and Day 3 advanced analytics exports.

Overall Gross Revenue

\$69.10M

Query 1 (stores join, no filter)

Leading City

Dubai

Revenue share: 56.1%

Repeat Purchase Rate

100.0%

5,000 of 5,000 customers

Largest RFM Segment

Lost

2,224 customers (44.5%)

BQ1: Where is revenue concentrated?

Gross Revenue (Query 1):

\$69.10M

Leading city: Dubai (56.1% of gross revenue)

Top category (Query 2 - ranked top-5 output, NOT gross total):

Electronics: \$38.51M

Avg revenue/transaction:

During promotion: \$120.44

Outside promotion: \$93.19

Interpretation: Revenue is geographically concentrated.

Promotions show a measurable

difference in avg transaction

value versus non-promotion

periods.

BQ2: What does the customer portfolio reveal?

Total customers: 5,000

Repeat purchase rate: 100.0%

RFM segments:

Lost: 2,224 (44.5%) | At Risk: 1,020 (20.4%) | Champions: 908 (18.2%) | Loyal: 848 (17.0%)

Risk: Lost + At Risk = 3,244 customers (64.9%) require re-engagement to prevent permanent revenue loss.

Champions + Loyal = 1,756 customers drive disproportionate revenue and need retention rewards.

Recommendation: Launch targeted win-back campaigns for Lost/At Risk. Reward Champions and Loyal customers with exclusive offers to maintain engagement.

BQ3: What does cohort retention indicate?

Avg retention by month post-acquisition:

Month 1: 78.9% | Month 3:

79.5% | Month 6: 79.3% |

Month 12: 80.2%

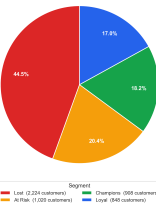

Interpretation: Retention rates indicate whether the customer base is stable, improving, or weakening over successive months after signup. Month-0 rates near 100%

are expected; sustained rates above 70% at Month 6+ indicate strong loyalty.

Recommendation: Monitor cohort decay curves monthly in Power BI. Trigger re-engagement at months where retention shows consistent dips.

Note: Monthly trend and top-product analysis use comparable SKU-month records from Query 6 (declining months only) - directional, not gross-revenue total.

Customer Distribution by RFM Segment

Recommended Actions

1. Protect and expand revenue in the leading city while developing lower-revenue cities.

2. Launch win-back activity for Lost and At Risk customers; reward Champions and Loyal customers.

3. Track cohort retention and promotion performance monthly in Power BI.
